

Secondary Collection and Transportation

Secondary Storage will be carried out by using 3.0 cum and 4.5 cum Metal Containers of 1.2 tons & 1.8 tons capacity. The Locations identified are based on the volume of waste generated in the locality and the guidelines stated in the State Policy.

The points identified including both at residential areas and commercial zones

Transportation of Secondary Containers will be carried out by Dumper Placers.

Platform Construction for placing secondary containers will be undertaken.
